

g. Scheduling employees to shifts

USE CASE

Textual Description

The HR Manager schedules employees (drivers and warehousemen) to weekly shifts. During scheduling, the system verifies that warehousemen are assigned to shifts where deliveries are expected to arrive, and that scheduled drivers hold a license type compatible with the truck assigned for delivery in that shift.

List of Actors

HR Manager

Pre-conditions

- Employees have submitted their shift availability.
- The Transport module contains planned deliveries linked to dates and shift types.

Post-conditions

The weekly shifts are updated and scheduled, covering all manpower requirements derived from the planned transport schedule, with no license violations.

Main Success Scenario

1. The HR_Manager selects 'Schedule Shift' for a specific date, shiftType, and store.
2. The system retrieves planned deliveries from the Transportation module for the specified (date, shiftType).
3. **FOR EACH** delivery in planned deliveries:
4. The system identifies the required Truck license type.
5. The system prompts the HR_Manager to select a Driver from available drivers matching the required license.
6. The HR_Manager selects a compatible Driver.

7. The system assigns the Driver to the Shift.
8. The system enforces the requirement for at least one 'Warehouseman' at the destination store.
9. **END FOR**
10. The HR_Manager selects a 'Warehouseman' from available employees for the destination store.
11. The system assigns the Warehouseman to the Shift.
12. The system saves the updated Shift schedule.
13. The system displays a success message.

Alternatives / Extensions

5a. No available Driver has the required license type:

1. The system displays an alert to the HR_Manager.
2. The HR_Manager must contact the Transport_Manager to change the Truck or find another driver.

10a. No Warehouseman is available for the required destination Shift:

1. The system alerts the HR_Manager to manually call a warehouseman for availability.
2. The system prevents saving the shift as valid until a warehouseman is assigned.
