

Contract: generateShortageOrder ()

- **Operation:** generateShortageOrder ()
- **Cross References:** Use Case f (Generate Shortage Order).
- **Pre-conditions:** The system is running. Inventory mock is accessible.
- **Post-conditions:** * New Order instances were created for every item returned by the Inventory Mock (instance creation).
 - Each Order was associated with the Supplier offering the lowest total price for that specific quantity (association formed).
 - The new Orders were saved to the database (state modification).
